

I am opposed to the FCC position and measures to increase the government's ability to easily spy on Americans. There are nearly NO checks and balances in the existing judicial authorization to tap Americans phones. Making high-speed INTERNET services easily tapped further erodes our rights that are supposed to be garenteed by our Constitution. The telephone wiretap laws have been unconstitutionally applied to Internet traffic, cable modem, broadband over power line, satellite, wireless and other high-speed Internet providers.

Stop eroding our Constitutional protections.
